DETAILED ACTION

Claim Objections

Claims 14 and 15 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 14 and 15 read on a plant whereas parent claim 1 does not embrace a plant.

Claim Rejections - 35 USC § 112¹

Claim 2 is rejected under 35 USC 112, second paragraph, as failing to particularly point out the claimed invention. The use of CHP is slightly confusing since it is not defined and is inconsistent with the terminology used in the claims. It is suggested that it be replaced with the phrase "cumene hydroperoxide".

Claims 4, 8, 10, 11 and 13 are rejected under 35 USC 112, second paragraph, as failing to particularly point out the claimed invention. The "preferably" phrases confuse the claims. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered

¹ The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 112 that form the basis for the rejections under this section made in this Office action:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1621

indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949).

Claim 9 is rejected under 35 USC 112, second paragraph, as failing to particularly point out the claimed invention. The claim contains a trademark/trade name. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is indefinite.

Claim Rejections - 35 USC § 102²

Claims 1 and 4-9 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 4,898,995. The reference teaches the claimed process carried out in a single reaction zone, note the examples such as Example 15. The instant claims do not require separate reaction zones for each step. Step (a) would be inherently carried out in the prior art process in the first part of the reaction zone. Step (b) is clearly taught by the reference.

Allowable Subject Matter

Claims 3, 12, 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

² The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
